

Foreword

It has been a great pleasure to bring you this *O-Level Exams Effective Guide – Science-Chemistry*. Producing this guide is like performing a balancing act – a fine balance has to be struck between conciseness and depth. We are in no doubt that we have managed both reasonably well. You will find all the essential concepts and contents laid out in an easy-to-read format, while adding depth at crucial points where interested candidates may find the added details essential in their understanding of the topic. The purpose of this guide is not just to help candidates excel in their exams (of course), but also to enhance their understanding and stimulate their thirst for knowledge by adding more increasingly required *creative-thinking-type* worked problems.

Table of Contents

1	Experimental chemistry	
1.1	Experimental design	1-2
1.2	Methods of purification and analysis	1-23
1.3	Identification of ions and gases	1-39
2	The particulate nature of matter	
2-1	Kinetic Particle theory.....	2-1
3	Atomic structure	
3-1	Atomic structure	3-1
3-2	Isotopes.....	3-5
4	Structure and properties of materials	
4-1	Structure and properties of materials	4-1
5	Ionic bonding	
5-1	Ion formation.....	5-1
5-2	Ionic bond formation.....	5-2
6	Covalent bonding	
6-1	Covalent bond formation	6-1
6-2	Physical properties of covalent substances.....	6-5
7	Formulae, stoichiometry and the mole concept	
7-1	Formulae	7-1
7-2	Equations	7-6
7-3	Stoichiometric calculations	7-9
8	Energy from chemicals	
8-1	Exothermic and endothermic reactions.....	8-1
9	Chemical reactions	
9-1	Speed of reaction	9-1
9-2	Redox.....	9-9
10	The chemistry and uses of acids, bases and salts	
10-1	Characteristic properties of acids and bases.....	10-1
10-2	Preparation of salts	10-10

11	Periodic table	
	11-1 Periodic trends	11-1
	11-2 Group properties	11-5
12	Properties of metals	
	12-1 Properties of metals	12-1
	12-2 Alloys.....	12-5
13	Reactivity series	
	13-1 Order of reactivity	13-1
14	Extraction of metals	
	14-1 Metal ores	14-1
	14-2 Recycling metals.....	14-2
15	Iron	
	15-1 The blast furnace	15-1
	15-2 Steel.....	15-3
	15-3 Prevention of rusting	15-4
16	Aluminium	
	16-1 Aluminium.....	16-1
17	Atmosphere and environment	
	17-1 Air.....	17-1
	17-2 Water.....	17-5
18	Organic chemistry	
	18-1 Crude oil	18-1
19	Fuels	
	19-1 Natural gas and petroleum as energy sources.....	19-1
	19-2 Fractional distillation.....	19-2
20	Alkanes	
	20-1 Homologous series.....	20-1
	20-2 Properties of alkanes	20-2
21	Alkenes	
	21-1 Cracking.....	21-1
	21-2 Saturated and unsaturated hydrocarbons	21-2

22	Alcohols	
22-1	Combustion and oxidation	22-1
22-2	Ethanol and its uses.....	22-2
23	Carboxylic acids	
23-1	Ethanoic acid formation	23-1
24	Macromolecules	
24-1	Monomers and polymers	24-2
24-2	Man-made fibres	24-2
24-3	Pollution.....	24-7
24-4	Natural macromolecules	24-7
25	Preparing for exams	
25-1	Glossary of terms used in science papers	25-6

Notes
